

Sacred Spaces at St Norbert's December 2024

The Leading Lights team at Saint Norbert's School embarked on a project to audit the school's sacred spaces. Working with the Hub chaplaincy support, they examined classroom spaces, resources for prayer and worship, public prayer areas, and even outdoor spaces.

The team identified areas they could develop and enhance with new resources and put together a pitch to the Sacred Spaces Fund. Their goal was to make their school's sacred spaces welcoming and accessible for everyone.

Once the shopping list was created, the team set off in a minibus, armed with their Sacred Spaces grant, to gather resources. It was fantastic to see the young people take real ownership in choosing the materials. They are now tasked with the enjoyable but important job of arranging all the new purchases to make St Norbert's look better than ever.

The young people continue to shape the sacred spaces for the school community, creating an environment that is unique, open, and accessible to all.
